WINDOWS AND DOORS

VSLIDE 82

MULTI-PURPOSE

With V-SLIDE 82, up to 4 sliding door leaves and fixed glazing elements can be combined in almost any combination. Regardless of the available space, the optimum door opening option can always be used: from space-saving lift-and-slide doors with one moving leaf to a wide external passage in four leaves constructions with maximum dimensions of up to 6.50 m wide and 2.70 m high.

DURABLE

V-SLIDE 82 guarantees many years of usability and efficient operation. Smooth profile surfaces are resistant to dirt and adverse weather conditions, are easy to clean and will never require painting. It is all done so that your sliding doors will look like new after many years.

STYLISH

V-SLIDE 82 is a smooth, seamless frame surface without unnecessary edges. The gaskets are practically invisible. The elegant appearance resulting from the low visibility of the frames fits perfectly into any architectural style. Strong, colourful accents are available on request: a wide range of colours, wood textured finishes and even aluminium covers in the desired colour!

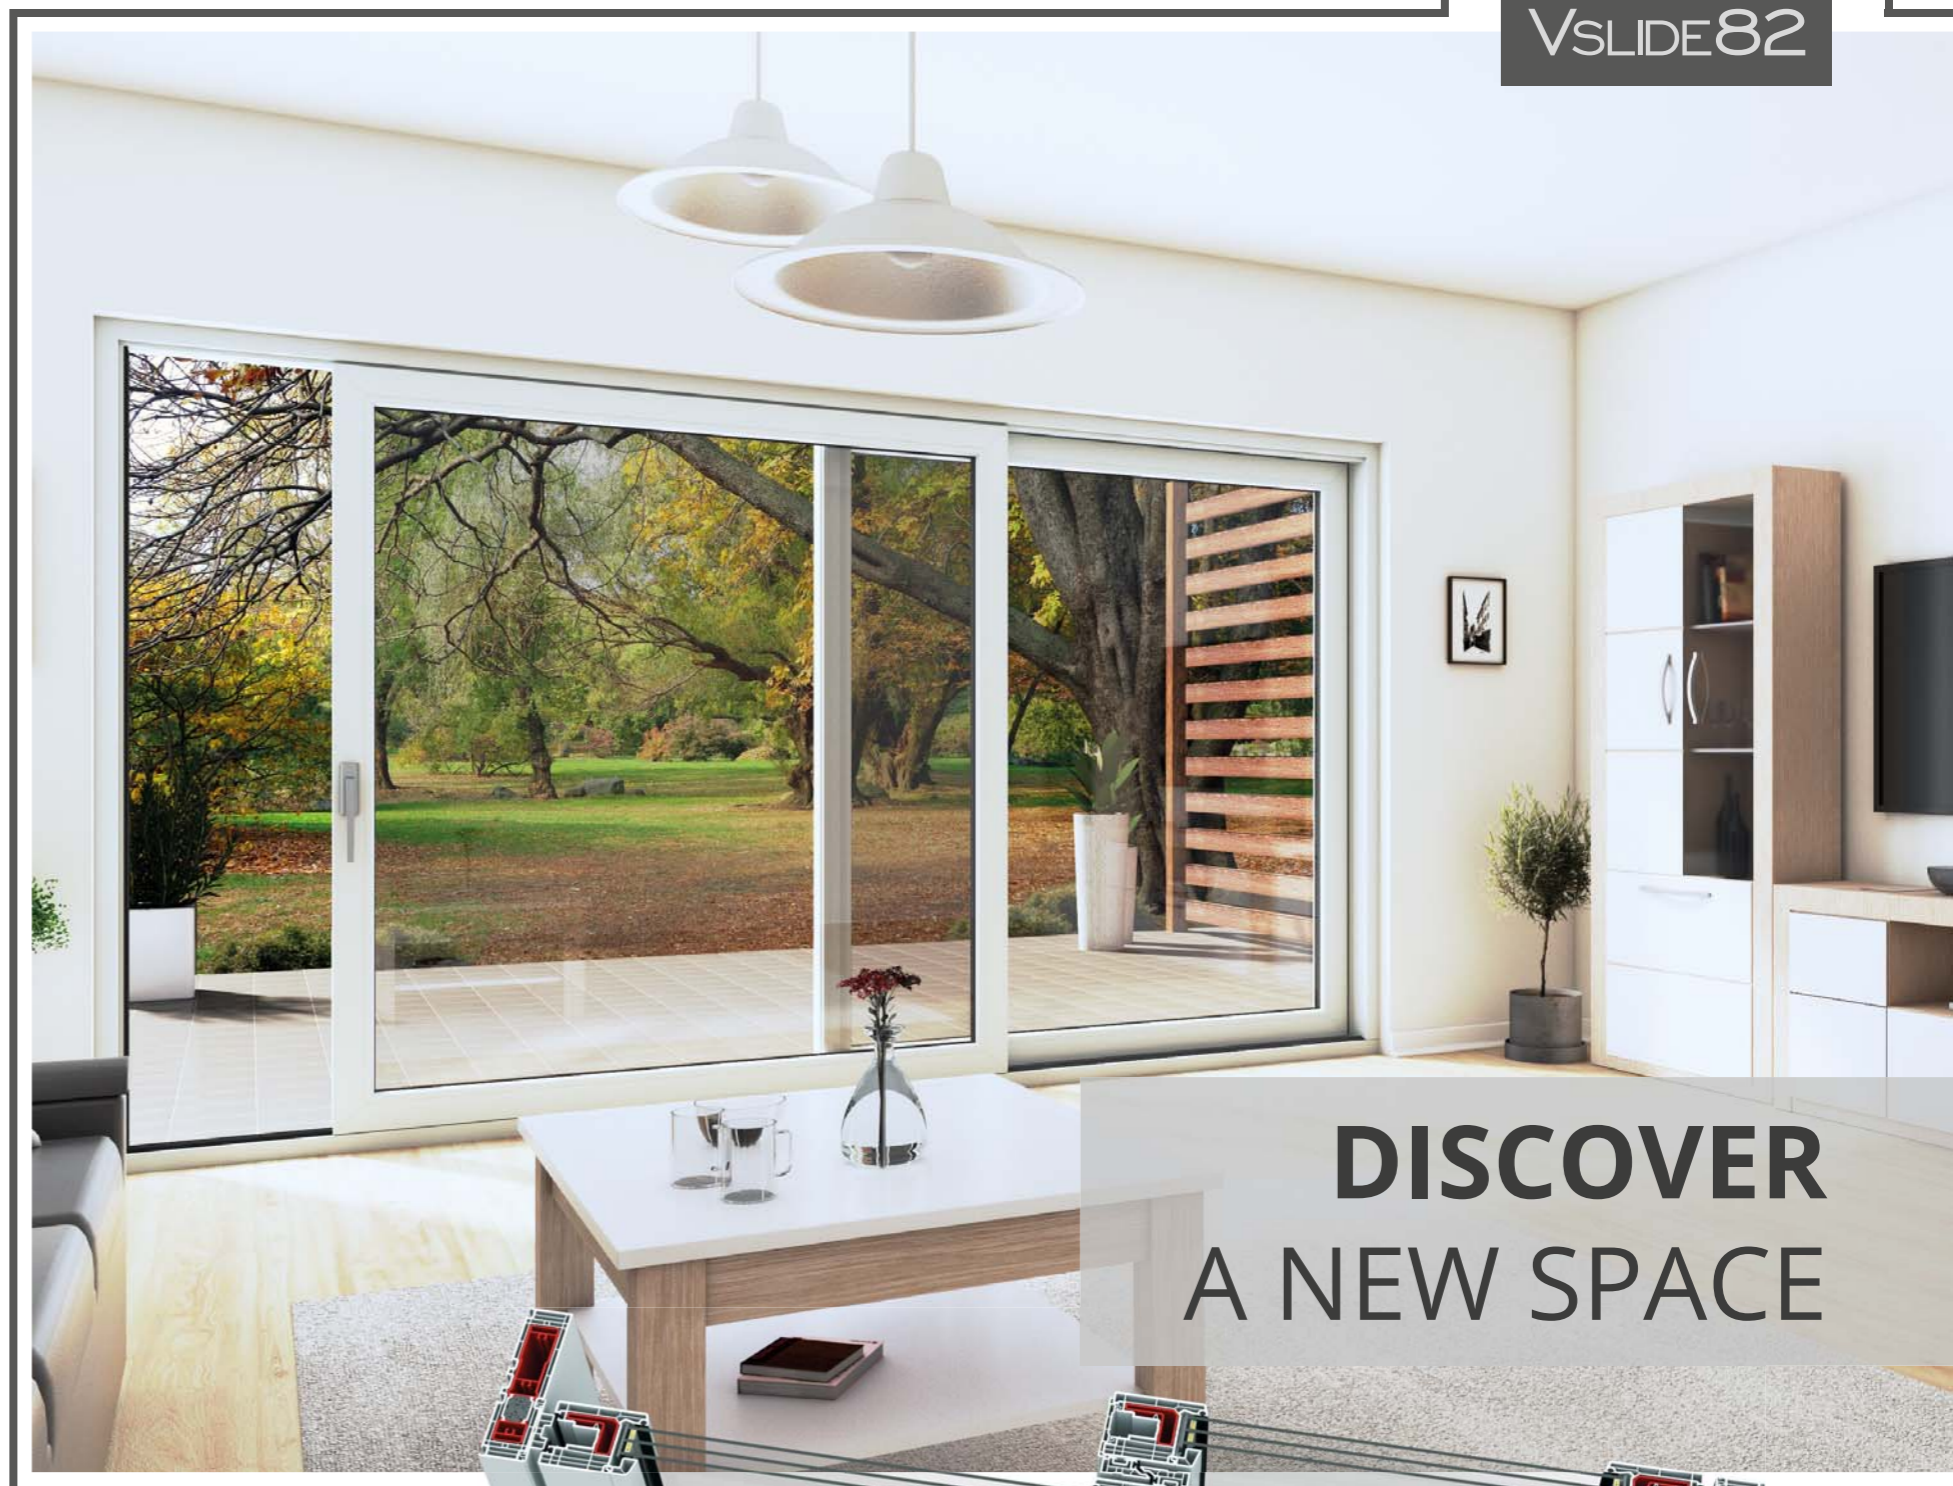

COST-SAVING

V-SLIDE 82 provides excellent thermal insulation even with large glazed areas, which enables to save valuable energy and reduce costs. It will easily meet all your present and expected energy efficiency requirements of your property.

COMFORTABLE

When the door is closed, the gaskets around the door along with the duo-thermally divided door sill that is equipped with an integrated insulation wedge protect the interior against cold, noise and heavy rain, making it cosy. When the door is open, you can enjoy full freedom, as the door sill is not a barrier, and the lift-and-slide doors, even if they are large, can be easily operated thanks to the precision bearing rollers and floor mount door guide.

VSLIDE 82

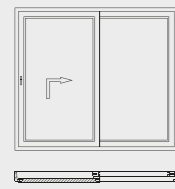

Lift-and-slide V-SLIDE 82 doors are the perfect combination of internal and external space. They provide an attractive view, light and fresh air on request. On the other hand, they effectively protect against wind and other adverse weather conditions, as well as against unwanted guests. Whether you need a narrow or a wide passage, barrier-free opening to the garden or a high, yet user-friendly large glazing: thanks to high-quality, carefully thought-out system components, the optimum solution can be performed under all circumstances and in any architectural style. Moreover, V-SLIDE 82 can achieve relatively good thermal insulation coefficients and save on costs and energy, even with very large glazing.

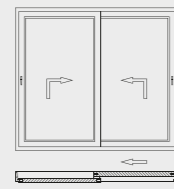

POSSIBILITIES OF IMPLEMENTATION

SCHEME A

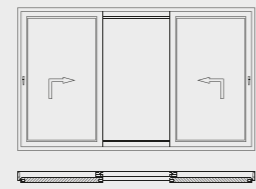

Two-part door with lift-and-slide door-leaf and glazed fixed part

SCHEME D

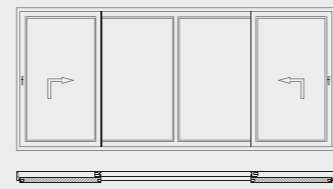

Two-part door with 2 lift-and-slide leaves

SCHEME K

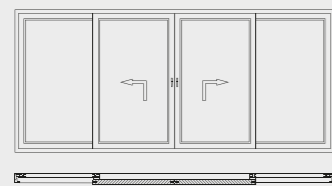

Three-part door with 2 lift-and-slide leaves and glazed fixed part

SCHEME K3

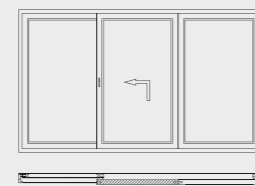

Four-part door with 2 lift-and-slide leaves opened to the inside and 2 glazed fixed parts

SCHEME C

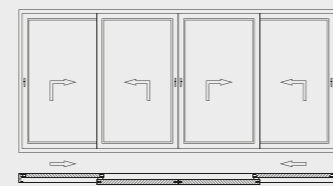

Four-part door with 2 lift-and-slide leaves opened to the outside and 2 glazed fixed parts

SCHEME C Variant

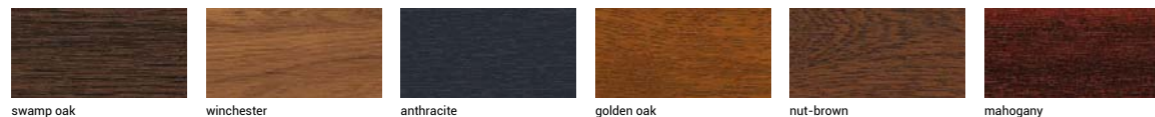

Three-part door with lift-and-slide door-leaf and 2 glazed fixed parts

SCHEME F

Four-part door with 4 lift-and-slide leaves

STANDARD COLOURS

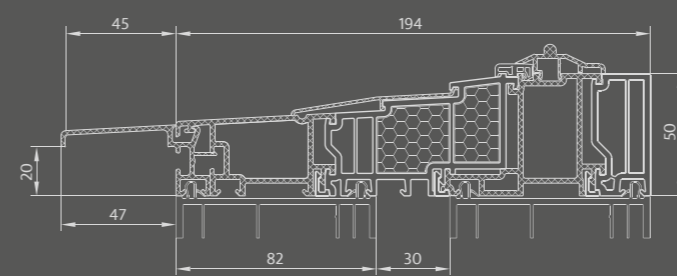

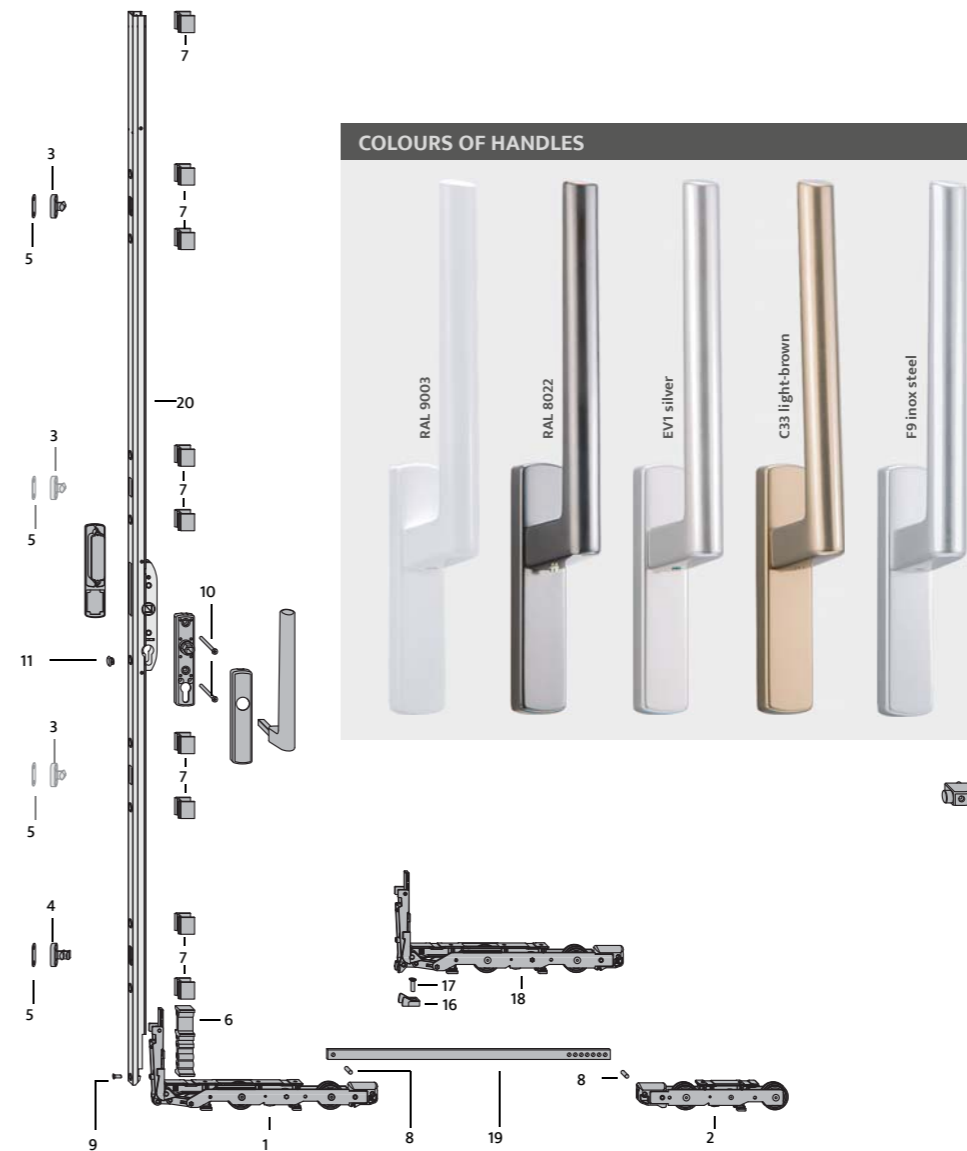

The actual colors may differ from the printed ones. Window profiles can be covered with foil, lacquered or colored in mass. For full color palette, visit www.amex-baczek.pl or ask our sales representatives.

- 19 - threshold strip
- 20 - double door bolt

DOOR SILL | WELL-THOUGHT SOLUTION

The newly designed door sill has excellent thermal insulation properties obtained, among other things, through the use of a duo-thermal partition and an integrated insulation wedge. This is the end of the cold floor areas.

A removable drip cap supports the armour of a lowered roller blind and facilitates later renovation work on the terrace or balcony.

The flat shape of the door sill and its flush finish make the structure not an architectural barrier.
